## BCI Applications

- ◎ Brain signal-based authentication system
  - ◎ Epilepsy seizure detection
  - ◎ Meditation applications
  - ◎ Educational applications
  - ◎ Emotion classification
  - ◎ Sleep disorder studies
  - ◎ etc.
- 

# Biosignals

- ◎ Signals that can be continually measured and monitored from the living being
- ◎ Can be electrical or non-electrical
  - Electrocardiogram (ECG)
  - Electroencephalogram (EEG)
  - Magnetoencephalogram (MEG)
  - Electrocorticography (ECoG)
  - Electromyogram (EMG)
  - Electrooculography (EOG)
  - Galvanic skin response (GSR)
  - Mechanomyogram (MMG)

# What is BCI

- ◎ Direct communication between enhanced brain and an external device.
- ◎ Methods
  - Invasive
  - Partially invasive
  - Non-invasive

## Related subject areas

- ◎ Neuroscience
- ◎ Digital Signal Processing (DSP)
- ◎ Digital Image Processing (DIP)
- ◎ Machine Learning (ML) - in the most cases

# Technologies

- ◎ fMRI: functional Magnetic Resonance Imaging
- ◎ EEG: Electroencephalography
- ◎ MEG: Magnetoencephalography
- ◎ NIRS: Near-infrared spectroscopy

## Basics of EEG

- ◎ Electroencephalography (EEG): Electrophysiological monitoring method to record electrical activity of one's brain
- ◎ Subtle electric field is generated by neurons
- ◎ EEG electrodes can capture the electric field of group of neurons

# Brain lobes

- ◎ Four brain lobes
  - Frontal
  - Parietal
  - Temporal
  - Occipital

# Electrode placement

- ⊙ 10-20 system
- ⊙ 10-10 system or 10%
- ⊙ 10-5 system

## Electrode placement (Cont.)

- 10-20 system & 10% system

## Basic flow

## EEG devices

- ⦿ Clinical- and consumer-grade devices are available
- ⦿ Two types of electrodes, Wet and dry
- ⦿ Comes with different number of electrodes

## EEG devices (Cont.)

| Device                | Number of Channels | Electrode type |
|-----------------------|--------------------|----------------|
| NeuroSky Mindwave     | 1                  | Dry            |
| Muse                  | 2                  | Dry            |
| EMOTIV Insight        | 5                  | Dry            |
| EMOTIV Epoc+          | 14                 | Wet            |
| OpenBCI               | 16                 | Dry            |
| mBrainTrain           | 24                 | Wet            |
| ENOBIO 32             | 32                 | Dry            |
| Cognionics Mobile- 72 | 64                 | Dry            |

# Pre-Processing

- ⊙ Filtering
  - Separate frequency bands
- ⊙ Artefact removal
  - Blind Source Separation (BSS)
- ⊙ Fourier Transform/Fast Fourier Transform

## Frequency bands

- ◎ Delta: 1 - 4 Hz
  - Highest amplitude
  - Presents during deep sleep
- ◎ Theta: 4 - 8 Hz
  - Focused attention, memory recall (frontal)
- ◎ Alpha: 8 - 13 Hz
  - Mental and physical relaxation (occipital, parietal)

## Frequency bands (Cont.)

- ◎ Beta: 13 - 30 Hz
  - Active thinking, active concentration
- ◎ Gamma: < 30 Hz
  - Binding of different populations of neurons

## Artifacts

- ⊙ EOG, EMG, ECG interferes the EEG signals
- ⊙ Impact of power line noise
- ⊙ Head swaying and swinging

To remove

- ⊙ Record other biosignals as well
  - ⊙ Filtering
  - ⊙ Record gyroscope data
- 

## Feature extraction

- ◎ Power Spectral Density (PSD)
  - ◎ Common Spatial Patterns (CSP)
  - ◎ Autoregressive Coefficients (AR)
  - ◎ Frontal Asymmetry
  - ◎ Inter-Hemispheric Power Difference
  - ◎ Inter-Hemispheric Linear Complexity
  - ◎ Spectral Coherence
  - ◎ Peak frequency
- 

# Pattern recognition/Machine Learning

- ◎ Linear Discriminant Analysis
- ◎ Quadratic Discriminant Analysis
- ◎ Support Vector Machine (Linear, Quadratic, Cubic, Gaussian)
- ◎ k-Nearest Neighbour
- ◎ Deep Learning techniques

- ◎ Augmented Reality (AR) and Virtual Reality (VR) with HMDs and smart glasses

The background of the slide is a light gray network pattern. It consists of numerous small circles, some of which are solid gray and others are hollow with a gray outline. These circles are interconnected by thin, light gray lines, creating a complex web-like structure that fills the entire background.

# Thanks!

**Any questions?**
